

ENDUROGALV

Heavy Duty Gal - Ladder Trays

Technologically Advanced Steel Coating AS1397:2011

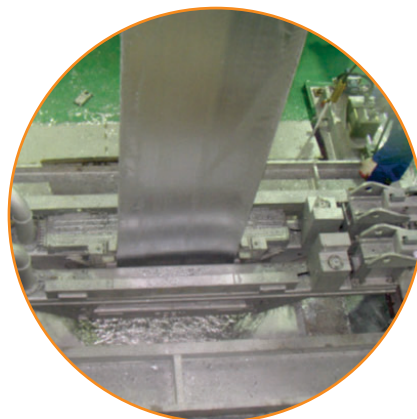

Heavy Duty Gal
Continuously galvanised coated material. Exceeds the corrosion resistance of traditional hot dipped galvanised materials.

- No sharp dags as seen on hot dipped galvanised products
- No requirement to cold galvanise cut edges
- Optimum results when powder coating is required
- Reduced lead times/faster manufacturing times
- Environmentally friendly "green steel" Manufactured from recycled steel
- Price competitive
- No reduction in product performance
- Consistent surface finish
- Aesthetically well designed to be more appealing than Hot Dipped Galvanized products that warp and have signs of oxidization (white rust)
- Burndy's Heavy Duty Gal products have been independently tested to exceed the performance of traditional Hot Dipped Galvanising

HEAVY DUTY GAL VS HOT DIPPED GALVANISED

Accelerated Corrosion Tested 1,000 hours through Australia's leading independent, full service accredited testing & certification company AUSTEST

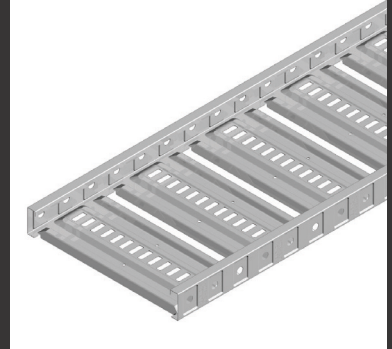

Continuous gal process

Heavy Duty Gal. range:

- » LT1 Ladder Tray
- » LT3 Ladder Tray
- » LT5 Ladder Tray
- » Flat covers
- » Peaked covers
- » Divider strip
